# VARNISHES

At Kenda Farben India, we have constantly worked on product innovation & development of special effect varnishes for shoes, leather and other substances. We manufacture coloring products for PVC/PU/TR/Rubber & EVA/Polystyrene/ABS materials. We offer all kinds of colours for synthetic surfaces and crust leathers.

A brief description of the products is as follows:

**FEDOR PVC** : Universal colouring varnish for PVC soles. It can be produced in virtually every colour and shade including metallic and can be applied by spray or dipping.

**FEDOR PU** : Colouring varnish for Polyester & Polyether PU Soles. It is produced in Matt/ Semi Glossy & High Gloss Versions, both covering & transparent, in all possible colours. We also specialize in offering cork finish and metallic shades.

**FALCON** : Special varnish for Polyether PU Soles. It offers excellent bonding with the surface and flexibility.

**TERMO** : Matt spray for TPR soles which also offers excellent rubber feel.

**TERMOLUX** : Colouring varnish for TPR soles. Termolux is produced in all possible colours and shades with covering/ transparent effects for TR Soles – Bottom, and, Welt/Heels.

**SPAZZOLATO** : Special varnish to achieve brush-off effect. It is an 'easy to brush' product which provides virtual leather like look for all types of PVC/PU/ TR & rubber surfaces and can be produced in all colours.

**SFUMATO** : Special varnish to achieve two tone finish without brushing the sole. It can also be produced in all colours and shades.

**PRODOTTO S** : Special varnish to colour rubber soles– both moulded and resin sheet. Transparent version of this product in conjunction with Termolux is used to achieve leather look finish on TR sole welt.

## VARNISHES

**PRODOTTO P** : Special varnish for painting the HIPS / ABS heels in desired colours including metallics.

**HYDRO EVA / FEDOR EVA** : Colour for EVA surface both in solvent and water base.

**TOLEDO** : a highly dyeing product for vegetable & chrome tanned leathers. It is a versatile finish which imparts excellent colouring with transparent effect on leathers, without changing the feel of the leather. This product can be used by dipping/hand padding and sprays methods.

It can be provided in any colour except metallic.

Another version of Toledo is used to achieve suede effect in 'colour' on the sole leather. To further enhance this look, Antara liquid should be sprayed.
